

British Medical Association Complete Family Health Guide / 9780751327229 / Dorling Kindersley, 2000 / 2000 / Tony Smith

The British Medical Association Complete Family Health Guide provides general information on a wide range of health and medical topics. The book is not a substitute for medical diagnosis, however, and you are advised always to consult your doctor for specific information on personal health matters. The naming of any organization, product, or alternative therapy in this book does not imply endorsement by the BMA, the BMA Consulting Medical Editor, the Medical Editor, or the publisher; the omission of any such names does not indicate disapproval. A CIP catalogue record for this book is available at [http://www.britainonline.com](#). The essential medical reference that's a must for every homePublished in association with the BMA, the Family Health Guide is the most authoritative and up-to-date information every family needs to understand and participate in their own health care decisions. With comprehensive coverage of every important aspect of health and medicine, it's easy to use and ideal for at-a-glance information and reference. Features on medical genetics and what it means for your health Lists the best medical websites for further information and advice User-friendly charts help you to interpret your symptoms In its new edition, The British Medical Association Complete Family Health Encyclopaedia describes the new methods of investigation and treatments that have been introduced. Coverage includes: common and uncommon diseases, disorders, and conditions; a comprehensive range of drugs and tests; new and established surgical procedures; information on diagnosis and treatment; and explanations of medical terms in everyday language. One million words, 5,000 entries, and more than 2,000 illustrations make this the most comprehensive book on health and medicine ever prepared for the British public. Produced by The British Medical Association (BMA) is a registered trade union for doctors in the United Kingdom. The association does not regulate or certify doctors, a responsibility which lies with the General Medical Council. The association's headquarters are in Tavistock Square, London and it has national offices in Cardiff, Belfast, and Edinburgh, a European office in Brussels and a number of offices in English regions. The BMA has a range of representative and scientific committees and is recognised by
