An excellent overview of fantasy and science fiction literature involving dinosaurs, from the very first in the end of the 19th century, to today's thrillers. Many obscure works of fiction are given long-needed attention, and this comprehensive look is a must for anyone interested in dinosaurs and fiction narratives. With the work of the late Michael Crichton and its spinoffs as the codifiers for today's image of dinosaurs, it's a real treat to see these fascinating creatures in the works of a potpourri of science fiction masters. Tallis (1984), for example, accepted Nineteen EightyFour and Gullivers Travels as great works of literature by arguing that they were more mimetic than fantastic in their scrupulously realistic realization (Tallis 1984: 193). Those who did venture to study science fiction and fantasy as science fiction and fantasy found themselves writing very much against the literary-critical grain. Le Guin (1974/1993: 2003) wrote with annoyance of brush-offs from literary snobs; Russ (1975 What Is the Difference Between Fantasy, Science Fiction, and Horror?
