Cortada, James W. Of the many opportunities for investment in information technology, which are the most urgent? To answer these questions, managers must first understand that information technology is more than just computers. Today, information technology must be conceived of broadly to encompass the information that businesses create and use as well as a wide spectrum of increasingly convergent and linked technologies that process the information. In addition to computers, then, data recognition equipment, communications technologies, factory automation, and other hardware and services are involved. As information technology becomes more widespread, the opportunities to take advantage of a new competitive scope will only increase. But how do we measure the digital economy and its contributions to growth and pertinent social indicators? Watanabe (2016), Brynjolfsson (2018), Nakamura (2018), Moulton (2018), and many other experts acknowledge the difficulty of precisely evaluating a digital economy characterized by rapidly changing products and services. More traditional tech tools, such as mobile applications, will also grow to critical mass in the small business value chain. This proliferation of modern tech-based solutions is key; according to the U.S. Chamber of Commerce's Q-2 2018 Small Business Index, "Companies that feel ahead of the technological curve are more likely to feel better about their business and cash flow and are planning to hire at a higher rate." adjust to company practices.
