It has been shown that healthcare workers, especially those working directly with patients, experience more stress, and can lead to higher burnout. This ultimately can lead to poorer patient care. If nothing else, a great jumping off point to get the wheels spinning on the importance of interpersonal feedback. Aguirre, B. E., Wolinsky, F. D., Niederauer, J., Keith, V., & Fann, L. (1992). Occupational Prestige in the Health Care Delivery System. A bibliography is a list of sources (books, journals, Web sites, periodicals, etc.) one has used for researching a topic. Bibliographies are sometimes called "References" or "Works Cited" depending on the style format you are using. A bibliography usually just includes the bibliographic information (i.e., the author, title, publisher, etc.). An annotation is a summary and/or evaluation. Therefore, an annotated bibliography includes a summary and/or evaluation of each of the sources. Depending on your project or the assignment, your annotations may do one or more of the following. Summarize: Some annotations merely summarize the source. What are the main arguments? What is the point of this book or article? What topics are covered? Source Book of Health Insurance Data: 1999-2000. Washington, DC, 1999. 18. National Center for Health Statistics. Health, United States, 2000 with Adolescent Health Chartbook. Hyattsville, MD: National Center for Health Statistics, 2000. 19. Starfield B. Primary Care: Balancing Health Needs, Services, and Technology. New York, NY: Oxford University Press, 1998. 45. Blumberg B. S., Larouze B., London W. T. et al. "The relation of infection with the hepatitis B agent to primary hepatic carcinoma." Am. J. Pathol. 81 (1975): 669-682. 46. Chisari F. V., Ferrari C. and Mondelli M. U. "Hepatitis B virus structure and biology." Microbiol. Pathol. Appropriate health literacy is also essential to health promotion, particularly as we address issues of primary prevention. A health literate individual is more apt to know how to answer the question "How do I keep myself well?" of the bibliography and to further the study of health literacy, we have defined health literacy as "the degree to which individuals have the capacity to obtain, process, and understand basic health information and services needed to make appropriate health decisions." Generally, items in foreign languages, letters to the editor, editorials, and book chapters were eliminated. In addition, references focused on communicating with special needs populations, e.g., visually/hearing impaired and psychiatric patients, were eliminated.
