

Liverpool John Moores University

Title: THE ASSESSMENT PROCESS IN PRACTICE
Status: Definitive
Code: **5017FDASPP** (106851)
Version Start Date: 01-08-2014

Owning School/Faculty: Nursing and Allied Health
Teaching School/Faculty: Nursing and Allied Health

Team	Leader
Catherine Taylor	Y

Academic Level: FHEQ5
Credit Value: 20.00
Total Delivered Hours: 64.00
Total Learning Hours: 200
Private Study: 136

Delivery Options

Course typically offered: Standard Year Long

Component	Contact Hours
Lecture	30.000
Online	20.000
Seminar	10.000
Tutorial	4.000

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	AS1	Undertake an assessment of needs and associated goal plan for a specific client (1500 words)	50.0	
Reflection	AS2	A reflective discussion: Analyse the role in assessment. (1500 words).	50.0	

Competency	Practice
-------------------	----------

Aims

To develop knowledge and understanding of the assessment process in practice, within the boundaries of the Assistant Practitioner role.

To appreciate the factors contributing towards goal/care planning.

To foster within students a problem solving approach to practice

Learning Outcomes

After completing the module the student should be able to:

- 1 Critically examine the assessment process.
- 2 Analyse key assessment skills and outcome measures in practice.
- 3 Identify specific assessment tools and issues relating to neurological, orthopaedic and respiratory conditions.
- 4 Analyse and evaluate the role of the AP in the interprofessional assessment process.
- 5 Attain competencies related to assessment as identified in WBCR

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

1500 word Needs & Goal Plan	1	2	3	
1500 word Reflection	4			
Practice				5

Outline Syllabus

History taking, interviewing and observation skills, collecting and correlating evidence, analysis of data, documentation, recording of information.

Key assessment tools, standardised and non-standardised assessment; activity and task analysis; identification of strengths and needs; goal/care planning; goal/care review, outcome measures.

Application of knowledge; problem solving; reflection; supervision, barriers, role definition, role reviews, holistic care.

Relevant NSF's, Patient empowerment, Partnership in goal setting aimed at maximising potential for independence

Learning Activities

Lectures / tutorials (group/individual), on-line support and reference, patient simulated encounters. Work-based Learning: practical demonstrations, observations of practice, application of practice under supervision.

Notes

Students must attain competencies as identified in the WBCR to pass this course.

Willard & Spackman's Occupational Therapy has a long tradition that extends back to the 1st edition published in 1947. Helen Willard and Clare Spackman, colleagues who taught together at the Occupational Therapy Program at the University of Pennsylvania, co-edited the 1st through the 4th editions. They turned the editorial responsibilities over to Helen Hopkins and Helen Smith, faculty members at Temple University and Tufts University, respectively. Willard and Spackman's Occupational Therapy, Twelfth Edition, continues in the tradition of excellent coverage of critical concepts and practices that have long made this text the leading resource for Occupational Therapy students. Students using this text will learn how to apply client-centered, occupational, evidence based approach across the full spectrum of practice settings. Peppered with first-person narratives, which offer a unique perspective on the lives of those living with disease, this new edition has been fully updated with a visually enticing full color design, and even more photo Willard and Spackman's Occupational Therapy : Willard and Spackman's Occupational Therapy - Crepeau The first textbook of its kind on the market, it presents the UN in its evolving role in this new era since the Cold War and shows its responsibilities for meeting challenges to the global community. This best-selling text employs a theoretical, practical, multidisciplinary approach to provide introductory students with a broad understanding of modern electric power. Customer Review: Willard and Spackman's Occupational Therapy. See full review. Merchant Video.Â Excellent book for learning the basics of occupational therapy. This book has more theory than practice, but it does an excellent job of teaching you how to think as a therapist. I highly recommend it to new therapists and students.
