University of California (System). California Sea Grant Program

California Sea Grant Program Records, 1981-2001

Physical Description: 69 mss

Description: The accession consists of 33 cubic feet of records arranged in a subject classed numerical scheme. These files largely document Sea Grant under the leadership of James Sullivan (1997-1999) and Russell Moll. The files include material documenting international Sea Grant Programs, organizations, UC Systemwide activities, correspondence, and committees. The records document programs including the Marine Advisory Program, the Knauss Fellowship and the Isaacs Scholarship. The files include substantial material documenting work undertaken by Sea Grant related to legislation. The files document the relationship between Sea Grant and federal, state and local agencies including NOAA.

The National Sea Grant program was created by legislation on October 17, 1966. The goal of the legislation is to make the oceans more productive in the service of people and the nation. The University of California requested that the National Science Foundation designate the University as a Sea Grant Institution in 1970, and it received that designation on October 25, 1973. In July 1970, the University submitted a proposal to the Office of Sea Grant Programs, National Science Foundation that was funded. In subsequent years, Sea Grant funds were administered by the National Oceanic and Atmospheric Administration (NOAA). Sea Grant was part of the University of California Institute of Marine Resources until IMR closed.

Moll, Russell  
Sullivan, James J.

The University of California announced today (Feb. 8) that it is launching the Double the Pell campaign to urge Congress and the new federal administration to charter a more affordable pathway to higher education for America's students and families. More. The University of California opened its doors in 1869 with just 10 faculty members and 38 students. Today, the UC system includes more than 280,000 students and more than 227,000 faculty and staff, with 2.0 million alumni living and working around the world. For almost 150 years, UC has expanded the horizons of what we know about ourselves and our world. Our campuses are routinely ranked among the best in the world, but our reach extends beyond campus borders. The University of California, Merced (UC Merced) is a public land-grant research university in Merced, California and is the tenth and newest of the University of California campuses. Established in 2005, UC Merced was founded to "address chronically low levels of educational attainment in the region." UC Merced enrolls 8,847 undergraduates and 696 graduates with 63.8% of students receiving Pell Grants, more than 99% of UC Merced students coming from California, and the largest percentage of low Oxford, 2001; Van den Berg H. Economic Growth and Development. Lincoln, 2001; Easterly W. The Elusive Quest for Growth. The MIT Press, Cambridge, 2002; Thirlwall A.P. Growth & Development with special reference to developing economies 8th Ed. London, NY, 2006. 12. , , «path dependence» ( - 1. 2001. 2. California Criminal Records Search. Database Update on February 22, 2021. Start Your Search Below. California Department of corrections puts at your disposal an electronic inmate locator. You can conduct your inquiry according to an inmate's last name or number. Results do not include abundant information. You will be able to see an inmate's full name, age, CDCR number, current location and admission date. You may choose to carry out a more focused arrest search by referring to the website of each county's sheriff office where you will most likely find an inmate lookup tool. For example, you can perform a Ventura County inmate search here. The University of California has a long tradition of involvement in many enterprises that are often geographically or organizationally separate from its general campuses, including national laboratories, observatories, hospitals, continuing education programs, hotels, conference centers, an airport, a seaport, and an art institute.
