Effective teaching requires creativity and innovation, therefore adopting various teaching strategies such as differentiation and problem solving is key. The classroom is a dynamic environment, bringing together students from different backgrounds with various abilities and personalities. Being an effective teacher therefore requires the implementation of creative and innovative teaching strategies in order to meet students' individual needs. Whether you've been teaching two months or twenty years, it can be difficult to know which teaching strategies will work best with your students. As a teacher there is no "one size fits all" solution, so here is a range of effective teaching strategies you can use to inspire your classroom practice.

1. Vis Teaching Methods [Teacher-Centered].  
**Direct Instruction (Low Tech)** Under the direct instruction model – sometimes described as the "traditional" approach to teaching – teachers convey knowledge to their students primarily through lectures and scripted lesson plans, without factoring in student preferences or opportunities for hands-on or other types of learning. This method is also customarily low-tech since it relies on texts and workbooks rather than computers or mobile devices.  
**Flipped Classrooms (High Tech)** What if students did the "classroom" portion of their learning at home and their "homework" interactive teaching is all about instructing the students in a way they are actively involved with their learning process. There are different ways to create an involvement like this. Most of the time it's through.
- 3 Effective interactive teaching strategies to encourage speech in your classroom. First, I want to put some activities in the spotlight. The following interactive student activities are three of the most effective ways to encourage more speech in your classroom.
  1. Think, pair and share. Set a problem or a question around a certain topic, and pair up your students.
  2. Create an interactive classroom full of interactive learning games. Games are so much fun for students since it doesn't feel like learning.
