The following creative problem solving tutorial is directly taken from one of the HighIQPro Desktop brain training app tutorials. Solving these problems requires approaching solutions indirectly and creatively. What is creativity? Definition of creativity. Creativity is the process of producing something that is both original and worthwhile. When someone comes up with creative ideas they are ideas that are novel and appropriate to the purpose at hand. Left brain vs right brain and creativity. Have you ever heard people say that they tend to be more of a right-brain or left-brain thinker? Left brain people are said to be more rational, analytic, and controlling, while right brain people are said to be more intuitive, crea... Problem-solving is a part of almost every person's daily life at home and in the workplace. Creative problem solving helps us understand our environment, identify the things we want or need to change, and find a solution to improve the environment's performance. Creative problem solving is essential for individuals and organizations because it helps us control what's happening in our environment. Humans have learned to observe the environment and identify risks that may lead to specific outcomes in the future. Anticipating is helpful not only for fixing broken things but also fo Problem solving is a creative process, and we distinguish three main sorts of algorithm for creativity (e.g., Johnson-Laird, 1993). First, a neo-Darwinian algorithm consists of a stage in which ideas are generated followed by a stage in which they are evaluated. Generation depends on arbitrary combinations and modifications of existing elements; evaluation depends on the use of knowledge as constraints to filter out useless results. They are converging on a neo-Lamarckian strategy for solving shape problems. Figure 7: An example of the main strategy in a non-deterministic finite-state automaton. On the right, is the shape problem in which the goal is to remove 2 pieces and 2 squares (Problem 7).
