This concise and informative manual covers key topics such as regulation of lipids and their role in atherosclerosis, clinical approach to evaluation

Practical Approach to Diagnosis & Management of Lipid Disorders is a useful guide designed to assist physicians in making an accurate assessment and developing a comprehensive treatment plan for patients with lipid d... Objective: Lipodystrophy syndromes are extremely rare disorders of deficient body fat associated with potentially serious metabolic complications, including diabetes, hypertriglyceridemia, and steatohepatitis. Due to their rarity, most clinicians are not familiar with their diagnosis and management. This practice guideline summarizes the diagnosis and management of lipodystrophy syndromes not associated with HIV or injectable drugs. Participants: Seventeen participants were nominated by worldwide endocrine societies or selected by the committee as content experts. Funding was via an unrestricted Book description. Bipolar disorder, or manic depression, is characterised by episodes of pathological mood states. The two poles are mania (with a predominant elated or irritable mood) and depression (with feelings of sadness, anxiety, guilt or hopelessness) but mixed states frequently occur.Â Since diagnosis and management are difficult, this practical guide provides an overview of the disorder and detailed guidelines for treating the illness throughout its stages, from authors internationally renowned for their work in bipolar disorder. Also discussed are disease theories, mechanisms and key clinical trials, as well as chapters devoted to psychosocial treatments, substance misuse and insights from 'lived experience'. You can write a book review and share your experiences. Other readers will always be interested in your opinion of the books you've read. Whether you've loved the book or not, if you give your honest and detailed thoughts then people will find new books that are right for them. 1.Â Chapter 4 Therapeutic Lifestyle Changes in the Management of Lipid Disorders and the Metabolic Syndrome 4.1 Nature and Nurture in the Development of CHD Risk Factors 4.2 Lifestyle Factors as Determinants of CHD Risk in Populations 4.3 Within Country Variations in Lifestyle and CHD Risk 4.4 The Metabolic Syndrome 4.5 Therapeutic Lifestyle Changes 4.6 The TLC Diet.Â When speaking to clinicians about lipid management, particularly those in primary
