Special Issue

Preparing Teachers to Teach Black Students; Preparing Black Students to Become Teachers

Guest Editors: Yolanda Sealey-Ruiz and Chance W. Lewis

Editor's Comment: Diversifying the United States' Teaching Force: Where are We Now?
Where Do We Need to Go? How Do We Get There?.....183
Ivory A. Toldson

Guest Editorial: Transforming the Field of Education to Serve the Needs of the Black Community:
Implications for Critical Stakeholders.....187
Yolanda Sealey-Ruiz and Chance W. Lewis

Commentary: Swords, Shields, and the Fight for Our Children: Lessons from Urban Prep.....191
Tim King

Foreword: Disparities, Economics, and Evidence: Beyond Politics in Teacher Education.....193
William F. Tate

Part I: Preparing Teachers to Teach Black Students

Teachers and Teaching for the New Millennium: The Role of HBCUs.....197
Jacqueline Jordan Irvine and Leslie T. Fenwick

From Maybe I Can to Yes I Can: Developing Pre-service and Inservice Teachers' Self-Efficacy to
Teach African American Students.....209
Kamau Oginga Siwatu, Paul Frazier, Osariemen J. Osaghae, and Tehia V. Starker

(Re)Framing Diverse Pre-service Classrooms as Spaces for Culturally Relevant Teaching.....223
Detra Price-Dennis and Mariana Souto-Manning

Key Theories and Frameworks for Improving the Recruitment and Retention of African American
Students in Gifted Education.....239
Donna Y. Ford, James L. Moore III, and Michelle Trotman Scott

Experience-Centered Instruction as a Catalyst for Teaching Mathematics Effectively to
African American Students.....254
Peter A. Sheppard

Pre-service Teachers' Knowledge for Teaching Algebra for Equity in the Middle Grades:
A Preliminary Report.....266
Irving A. Brown, Trina J. Davis, and Gerald Kulm

Moving Beyond the Boat without a Paddle: Reality Pedagogy, Black Youth, and Urban
Science Education.....284
Christopher Emdin

A Case for Culturally Relevant Teaching in Science Education and Lessons Learned for
Teacher Education.....296
Felicia Moore Mensah

The Use of Educational Documentary in Urban Teacher Education: A Case Study of <i>Beyond the Bricks</i>	310
Yolanda Sealey-Ruiz	

Towards A Pedagogy of Hip Hop in Urban Teacher Education.....	325
Thurman Bridges	

New Visions of Collective Achievement: The Cross-Generational Schooling Experiences of African American Males.....	339
Darrell Cleveland Hucks	

Minding the Gap: Cultivating Black Male Teachers in a Time of Crisis in Urban Schools.....	358
Amber Jean-Marie Pabon, Noel S. Anderson, and Haroon Kharem	

Part II: Preparing Black Students to Become Teachers

Pathways to Teaching: African American Male Teens Explore Teaching as a Career.....	368
Margarita Bianco, Nancy L. Leech, and Kara Mitchell	

Identifying New Sources of African American Male Pre-service Teachers: Creating a Path from Student-Athlete to Student-Teacher.....	384
David A. Byrd, Bettie Ray Butler, Chance W. Lewis, Fred A. Bonner II, Michael Rutledge, and Jesse J. Watson	

“I Don’t Think Black Men Teach Because How They Get Treated as Students”: High-Achieving African American Boys’ Perceptions of Teaching as a Career Option.....	398
Anthony Graham and Kimberly D. Erwin	

The Black Teacher Shortage: A Literature Review of Historical and Contemporary Trends.....	417
Tia C. Madkins	

Epilogue: Passing the Torch: The Future of Education in the Black Community is in Our Hands.....	428
Yolanda Sealey-Ruiz and Chance W. Lewis

Most teachers use paper-based coursebooks. It's difficult to maintain a streamline flow in a lesson if students need to look at the book offline, not at the computer screen. But you can use a digital coursebook. Management. It's hard to manage students online. But still, feedback online is possible. You can ask students to use a video camera, send emojis, (if the platform allows) send stickers, put their hands and many other things. Human presence. We can be present by leaving a comment to a post, by turning on our web camera, by personalising the course in the school Language Management System, by recording voice feedback to our students' writing. Language learning. It's a social process, natural interaction patterns are crucial. Teachers of middle school and high school students generally concentrate on one or two specialty subject areas, such as math or science. Within these broader areas, a teacher might instruct multiple courses. For example, a high school teacher specializing in the subject area of science might teach courses in chemistry, biology, and physics. Scholarships tend to be competitive, so be prepared to showcase your skills, awards, honors, and qualifications on your application. Check for scholarships particular to your state as well as those offered at the national level. Becoming a teacher involves several steps. The education and certification process culminates in a real-world teaching experience. Most universities and colleges refer to this step as "student teaching." The good teacher will have manipulatives that the students can handle to help them learn. The good teacher sees him or herself as someone who is there to help. Continue Reading. Preparing is something good teachers always do. Great teachers are great learners. So the first thing is always learn about your subject and ways to teach it better. The successful conducting of the lesson and the achievement of the goals set is largely determined by the coordinated activity of the teacher and students, which in turn depends on their preparation for the lesson. Careful preparation for the lesson is especially necessary for young teachers who do not have sufficient experience in pedagogical work. In preparing a teacher for a lesson, there are two stages: preliminary and immediate. Preliminary preparation for the lesson consists in the teacher studying the special, pedagogical and methodological literature, in carefully familiarizing himself. In fact, teachers are integral to preparing the next generation of doctors, engineers, and scientists, as well as the next generation of teachers to teach the generation after that to be doctors, engineers, scientists, etc. Despite this, the United States, and indeed the world, is experiencing an enormous teacher shortage. These alternative teaching programs are meant to widen the potential teacher pool by allowing those without degrees in education to become licensed to teach. This is great for those with expertise in a specific subject experiencing a teacher shortage, those with valuable life experience, or those recently returned from teaching English abroad armed with a non-education related bachelor's degree and a newfound interest in teaching and shaping young minds.
