At the start of the third millennium, we can put together a credible account of the story of the creation of the universe. Peter Aughton. 2008. 1. The development of astronomy and astrology were not confined to Egypt and the Mediterranean world. The Chinese, the Aztecs and the Incas all studied the stars and tried to predict eclipses and other events in the heavens. "NightWatch" is the perfect introduction to astronomy and stargazing. It has been the top-selling stargazing guide for over 20 years. Now in its revised fourth edition, the book contains everything you need to know about what's up in the sky through the year 2025. The book's chapter is dedicated to stargazing technology, like binoculars and telescopes. "NightWatch" assumes that the reader has no prior experience with astronomy. Author Dava Sobel follows the stories of several women, which she collected from old diaries, letters and published observatory log books. Based on their calculations, these women - including Williamina Fleming, Antonia Maury, Henrietta Leavitt, Annie Jump Cannon and Cecilia Payne - made some of the most fundamental discoveries of our universe. ~
