

The Sky Scrappers - Mabel Osborne, Caroline Wright, Sara M. Bourke - Engraved and printed by White-Smith Music Publishing Company, 1906 - 1906

Skyscraper construction surged throughout the 1960s. The impetus behind the upswing was a series of transformative innovations[39] which made it possible for people to live and work in "cities in the sky".[40]. In the early 1960s structural engineer Fazlur Rahman Khan, considered the "father of tubular designs" for high-rises,[41] discovered that the dominating rigid steel frame structure was not the only system apt for tall buildings, marking a new era of skyscraper construction in terms of multiple structural systems.[42] His central innovation in skyscraper design and co...
