

Globalization and Changing Patterns in the International Transmission of Shocks in Financial Markets, , ISSN 1073-2489, / National Bureau of Economic Research, 2002 / 2002 / Michael D. Bordo, Antu Panini Murshid

Leading Russian journal in International studies with special focus on regional security and development in Asia, Africa and Latin America, cooperation within BRICS, SCO and CIS as well as international academic cooperation. In the article, the authors tried to provide an overview of the publications of foreign and Russian researchers on modern theories of regionalism, examined the evolution of theoretical approaches to the study of regionalism, and also tried to identify the main trends and niches in the development of regional studies abroad and in Russia. The current practice of regional development requires the development of new theoretical and methodological approaches to their study. There is a wide variety of different integration forms in modern world. Global Banks and International Shock Transmission: Evidence from The Crisis. Nicola Cetorelli Federal Reserve Bank of New York. Linda S. Goldberg Federal Reserve Bank of New York and NBER. December 2009 (draft: not for quotation or citation without permission from the authors). Changes in the sources of funds for banks initiate the lending channel reactions (Kashyap and Stein 2000). Banks typically rely on local deposits and other host market funding sources, as. It is important to point out that international transmission also occurs through cross-border flows by global banks, even those without overseas branches and affiliates. Using this data from U.S. banks, Correa and Murry (2009) show that the transmission of policy and. 5. Bordo, Michael D. & Murshid, Antu Panini, 2006.
